

What is Bitdefender Mobile Security for Android?

Bitdefender Mobile Security for Android is an award-winning app that provides the best protection for Android smartphones and tablets against viruses, malware, and online threats like phishing and scams. It includes features like real-time virus and malware scanning, web protection, an anti-theft tool for locating or wiping a lost device, and call blocking for spam calls. The app uses cloud-based technology, resulting in minimal impact on the device's battery and performance.

System Requirements:

- Android 6 or later
- An active Internet connection for activation and in-the-cloud malware scanning

Bitdefender Mobile Security for Android Features

Protection:

- **Malware Scanner** – Automatically scans every app you install and immediately alerts you if it poses a threat. You can also manually scan your Android device at any time to make sure all apps are safe.
- **Web Protection** – Blocks malicious and phishing websites in real time to keep your browsing safe. This feature is compatible with the most popular Android browsers:
 - default Android browser
 - built-in browsers from Facebook and Facebook Messenger
 - Chrome
 - Firefox
 - Brave
 - Dolphin
 - DuckDuckGo
 - Edge
 - Firefox Focus
 - Huawei browser
 - Opera
 - Opera Mini
 - Puffin Cloud Browser
 - Samsung Internet
 - Yandex Browser
- **Scam Protection** – instantly detects suspicious links in SMS and chat messages, helping you steer clear of phishing and online scams. [\[Learn more\]](#)
- **App Anomaly Detection** – Protects your Android device from rogue apps that try to hijack your login credentials or steal personal and financial information. [\[Learn more\]](#)

- **WearON** – Extends Bitdefender protection to your smartwatch for an extra layer of security. If you misplace your phone, you can trigger a sound alert from your watch to locate it easily. WearON also notifies you if you move too far away from your phone, ensuring you never leave it behind.

Privacy:

- **Call Blocking** – Blocks unwanted calls from spam, scams, and hidden numbers. [\[Learn more\]](#)
- **VPN** – Encrypts all Internet traffic to protect your privacy and lets you access geo-restricted content (includes 200 MB/day of encrypted traffic). [\[Learn more\]](#)
- **App Lock** – Locks your sensitive apps from unauthorized access with a PIN code or your fingerprint.
- **Account Privacy** – Checks if your email accounts have been involved in any known data breaches. Simply validate your email address, and Bitdefender will alert you if your credentials have been leaked so you can update your passwords. [\[Learn more\]](#)

Utilities:

- **Anti-Theft** – Lets you remotely locate, lock, wipe or send a message to your smartphone in the event that your device is lost or stolen. Plus, it snaps a photo of the intruder after 3 failed attempts to unlock your Android device. [\[Learn More\]](#)
