

How to Turn Off Scam Protection Pro on Windows

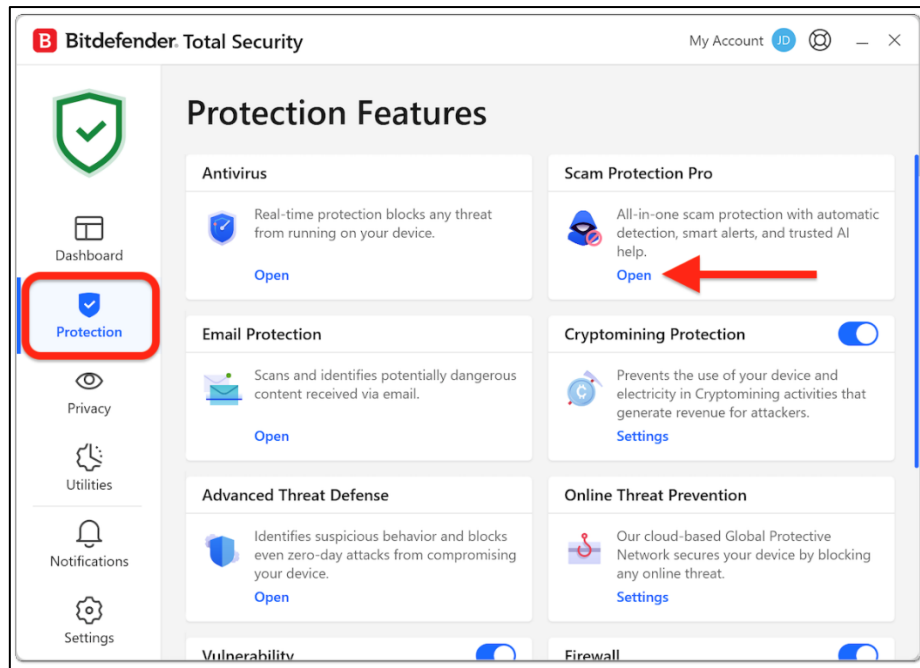

If you need to turn off the Bitdefender [Scam Protection Pro](#) feature on a Windows computer, follow these easy steps.

Step 1. Open Scam Protection Pro

1. Open **Bitdefender Total Security**.
2. On the main dashboard, either:
 - Hover the cursor over **Scam Protection Pro** and select **Open**, or

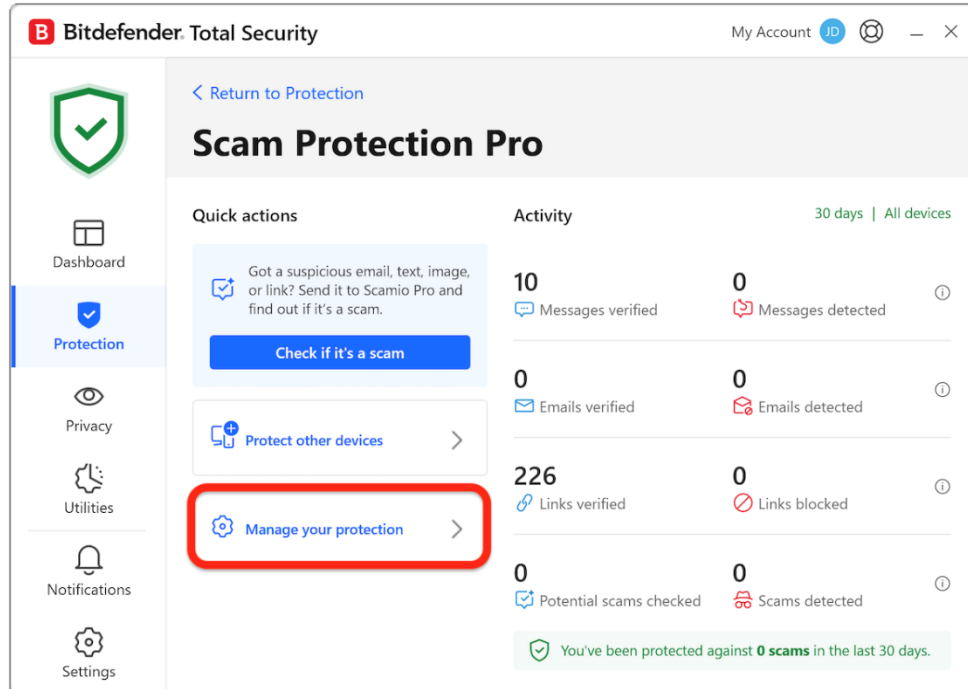

- Click on **Protection** on the left side menu, then click on **Open** in the **Scam Protection Pro** panel.

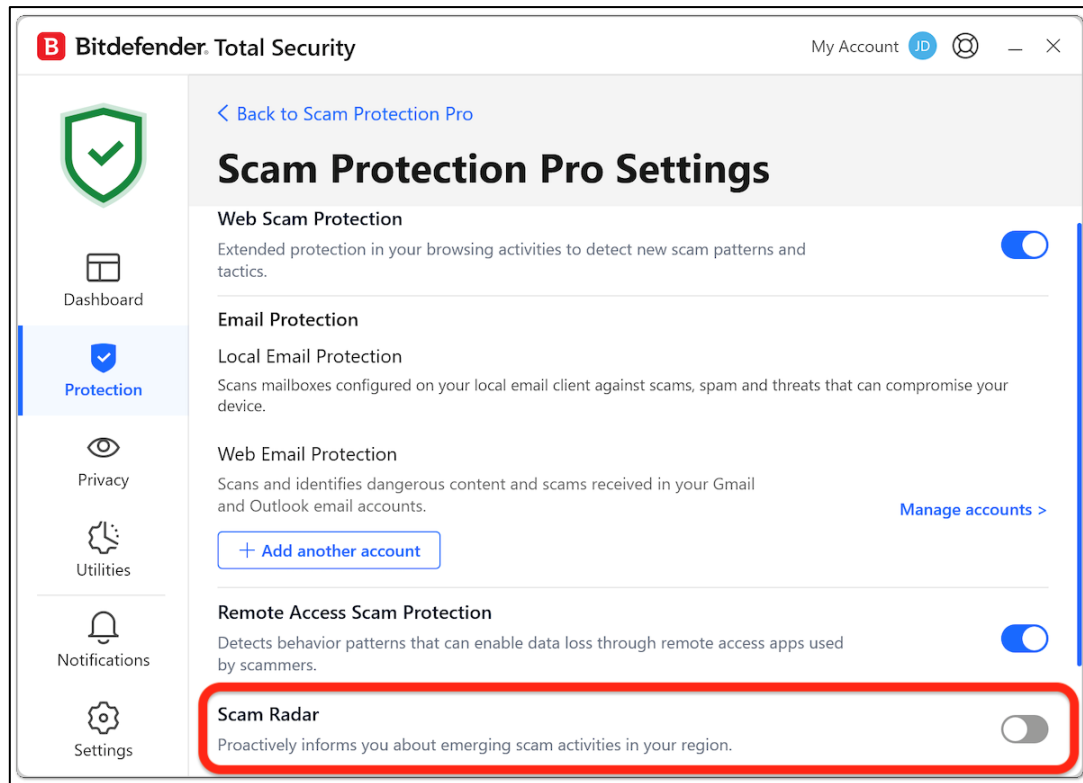

Step 2. Go to Settings

1. In the Scam Protection Pro module, click on the **Manage your protection** option.
2. This will open the Scam Protection Pro settings.

Step 3. Disable Scam Radar

1. Scroll down and turn off the **Scam Radar** option.
2. The switch will change color from blue (active) to gray (disabled).

Once the Scam Radar switch turns grey, Scam Protection Pro will be disabled on your windows computer, and you will no longer be informed about emerging scam activities in your region.
