

Quick Actions: Pin your favourite Bitdefender features to the dashboard

Quick Actions allow the user to easily access almost any product feature from the Bitdefender dashboard without navigating to a particular module. For example, adding SYSTEM SCAN as quick action allows you to start a full scan from the dashboard without navigating to the Antivirus module.

In total, there are six **configurable Quick Actions** in Bitdefender. Pin the features you use the most to the dashboard. These can be replaced at any time. Thus, if you decide that you don't need System Scan as a Quick Action, you can replace it with another one.

Here are the features that can be added as Quick Actions:

- Quick Scan
- System Scan
- Vulnerability Scan
- Wallet
- Safepay
- VPN
- File Shredder
- OneClick Optimizer

By default, Bitdefender comes with four actions that can be replaced with the ones you know you mostly use. To replace a quick action:

1. Click the pen icon in the upper-right corner of the card you want to remove.
2. Scroll up and down to the feature you want to add to the main interface, and then select the radio button next to its name.
3. Click the Add icon to pin the feature to the dashboard.
